What is a Domain Specific Language?

Language specialized to a particular application domain or area of expertise

What is a Language Workbench?

Development Environment to create and use

Domain Specific Languages

Domain Problem to Solution

Domain Idea

Machine Language
Manual Coding

- slow
- tedious
- error prone

Can I add another language?

Language of Languages (LoLs)

Workbench

Free

nothing to buy

Open Source

everything accessible

Software as a Service

nothing to download, install or configure

Client-side (JavaScript)

your Intellectual Property(IP) doesn't leave your desktop

LanguageOfLanguages.com/workbench/

Low Barrier to Adoption!

Language of Languages (LoLs)

Workbench

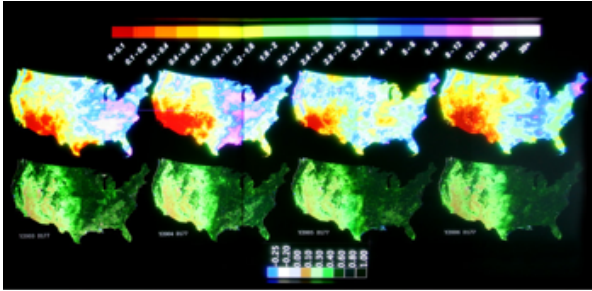

[Language Of Languages demo](#)

So that's a Language Workbench...

Now What?

Computing for Climate Change

Legacy Application Modernization

A Future of Programming Vision via Bret Victor

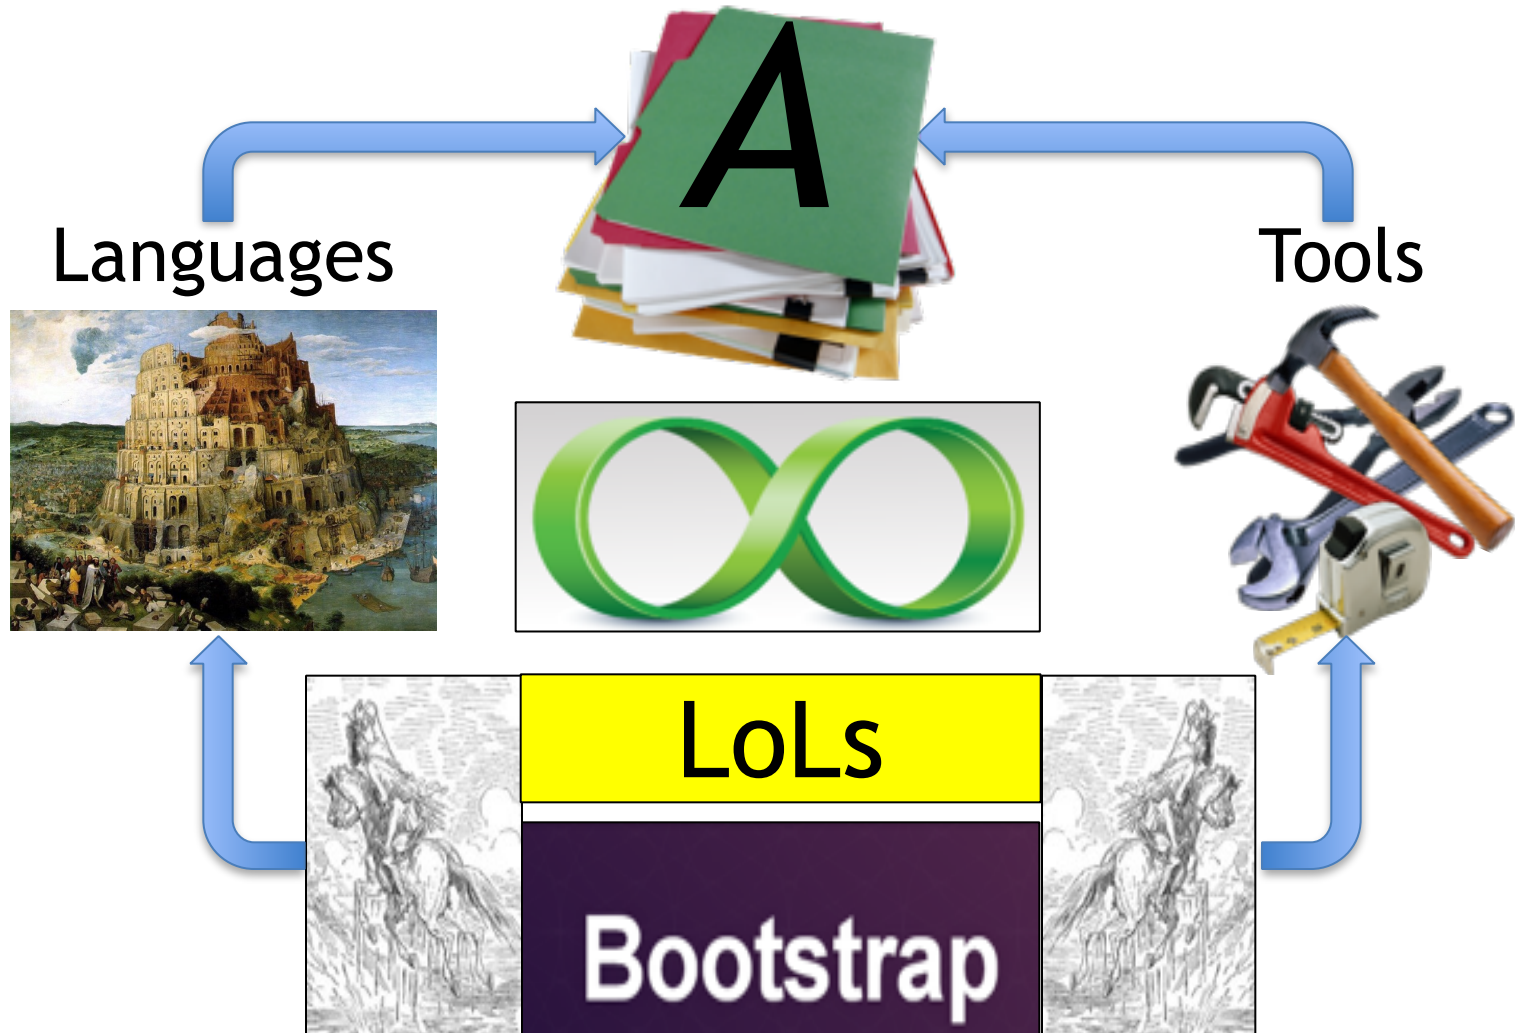

What's
your idea?

Development Areas

Applications

A Contributors Experience

—Alyssa Pavao

- How I found out about Language of Languages
 - I heard Andi and Jamie talk about open source at a Western resume writing workshop
 - I followed up to learn more about Language of Languages and how I could get involved
- My current Language of Languages project is Client-side Federated Logon
- What I hope to get out of contributing to Language of Languages
 - learn and demonstrate new skills
 - enhance my computing portfolio and resume
 - advancing language workbench technology
 - working on a fun, open source project

Spice up your resume by learning
about & collaborating on real-world
open source projects

Open your mind, Open your code

OPEN SOURCE DAY AT WWU

On Saturday May 9th ,
join us in VU565 from 9:30- 5:30

free for students, \$ 10 for non

<http://www.wvu.edu/emarket/opensource/day/>
